

## Part 4 St Germain Group Living Organism Study Guide

### DISCOURSE 4 (PAGE 2-3/5) – OPERATING IN SOUL CONSCIOUSNESS

Link for further study: [Part 4 New Living Organism](#)

The Science of Impression, if studied by the Disciples or Initiates in the world and by the New Group of World Servers, and the New Living Organism of Group Initiates, will greatly facilitate the presentation of those Ideals which will now condition the thinking of the New Age, and will eventually produce the New Cultures and the New Civilized expression which lies ahead of humanity, superseding the present civilization and providing the next fields of expression for mankind. . .

One point you all need to grasp is that the progressing Disciple and Initiate does not move into new fields or areas of awareness, like a steady marching forward from one plane to another. What must be grasped is that All That IS, is ever present, but not always seen or known from a human point of view.

What we are concerned with is the constant awakening to that which eternally IS, and to what is ever present in the environment but of which the subject is unaware, owing to the short-sightedness of humanity. The aim must be to overcome the undue concentration upon the foreground of daily life which characterizes most people, the intense preoccupation with the interior states or moods of the lower self which characterizes the spiritually minded people and the aspirants, and the imperviousness or lack of sensitivity which characterizes the mass of mankind. The Kingdom of God is present on Earth today and forever has been, but only a few, relatively speaking, are aware of its signs and manifestations.

Revelation is a generic term covering all the responses to the activities of the Eye of the Mind, the Eye of the Soul, and the 'Insight' of the Universal Mind which contact with the Monad gives. Sight is the greatest of all the developments in this world period in which the Logos is seeking to bring the subhuman kingdoms to the point where human vision is theirs, to bring humanity to the point where spiritual vision is developed and hierarchical insight is the normal quality of the initiate sight, and to bring the Members of the Hierarchy to the point where universal perception is Theirs. Therefore, it might be said that:

1. Through the Door of Individualization, the subhuman kingdoms pass to human vision, leading to mental contact and intelligent impression.
2. Through the Door of Initiation, humanity passes to spiritual vision, leading to soul contact and spiritual impression.
3. Through the Door of Identification, the Hierarchy passes to universal vision, leading to monadic contact and extra-planetary impression.

Each time that there is a fresh vision of a compelling and conditioning nature, it is the result of invocation by the one seeking the New Impression. When this invocative spirit is present, the results are inevitable and sure, and the response evoked cannot be stopped. This is the basis of all the success of desire (material or otherwise), aspiration, prayer and meditation. Always we get, in time and space what we invoke; and the knowledge of this fact, scientifically applied, will be one of the great liberating forces for humanity.

It might be said that consciousness itself, which is the goal, on this planet, of all the evolutionary process, is simply the demonstrated result of the Science of Contact. It is likewise the goal in some form or other and at some stage or other of all planetary existences within the solar system itself. The unfoldment of this conscious response is, in reality, the growth of the sensitive awareness of the planetary Logos Himself. The human mechanism and its ability to respond to its environment (as science well knows) has been developed in response to an inner urge, present in every human being and in all forms of life, and to the 'pull' and magnetic effect of the surrounding environment.

Step by step, the forms of life upon the physical plane, down through the ages, have unfolded one sense after another; one form of sensitive response after another becomes possible as the mechanism is produced, until the human being can receive impressions from the physical plane and rightly interpret them. They can respond to the emotional contacts of the astral plane and succumb to them or surmount them. They can become telepathic to the world of the mental plane, thus sharing physically, emotionally and mentally, in the life and contacts of the three worlds which constitute his or her environment and in which he or she is submerged whilst in incarnation.

## DISCOURSE 5 (PAGE 1/8)

Link for further study: [Part 5 New Living Organism](#)

It is no mistake that within the Teachings and New Formulas of Approach, that you began working on together with Beloved Master Djwhal Khul, have now progressed to opening this Work to a more expanded nature of the First, Second and Seventh Rays with other Divine and Christed Beings of these Rays and more. As you will discover soon within these Teachings, the New Living Group Organisms will no longer be confined in expressing your own personal Rays, but as a Group Living Organism, where all the Rays begin to merge together as One Unified Expression or the Qualities and Virtues of the 49 aspects of the Seven Rays.

Please Know you are all Working here toward a Single Goal; that of the Creation of the New Radiation Pyramidal Light Temples and Human Christ Councils, who will provide the Mantles of Love and Light,

The Electromagnetic Impulses that will allow Us to come and Stand before you in Our Physical Light Bodies, where any human beings within their physical sight and hearing will be able to finally see Us for REAL; to Communicate Directly with us without the old forms of broken and sometimes imaginary communications of the past!

#### DISCOURSE 5 (PAGE 5/8)

So, when you begin to charge It in and around yourself and your affairs, the human is going to have to disappear. This is the Power of Mastery, and the Sacred Fire is the Controlling Force and Directing Intelligence of the Mighty 'I AM' Presence by which all energy is controlled everywhere in outer manifestation. Therefore, when you begin to use your Decree, the Flaming Christ, be prepared to recognize the world around you, 'I AM' meaning your individual world, filled with the Violet Consuming Flame, which is the Sacred Fire. And when that is established permanently around the physical body as a Sun Presence, you will find that Violet Flame Sun will control all conditions around you wherever you move. It will control all the Powers of Nature and all the Forces of the Elements.

So, as you think deeply upon this and come into Its Greater Use, you will begin to realize that through It your Freedom is attained. And what is your Freedom? Freedom from all that is not the Great Cosmic Control by the Sacred Fire of all manifestation wherever you move in the Universe. That Sacred Fire is only released in and around you as you love It enough. The intellectual concepts of It will give you the Picture, but it is your love to that Sacred Fire that is the Power of the Great Central Sun Magnet in you that draws that Sacred Fire into outer conditions to be the Master Presence controlling them.

The Cosmic Law is the same for you. As you continue to build the Momentum of the Sacred Fire in and around your physical body will you find conditions in the physical world being controlled by the Radiation of that Sacred Fire around you. And as you intensify and expand that, you will find that Sacred Fire controlling conditions by the Power of the Great Silence. If that Sacred Fire is drawn around you intensely enough, you would scarcely have to speak a Command to the outer conditions; for the very Presence of the Love in that Sacred Fire would harmonize and purify all you contacted until It would automatically cooperate with you in the Fulfilment of the Divine Plan to produce whatever you desire.

Now this has a very powerful effect upon your channels of supply. And if people understood that when they call for supply, the Cosmic Law is going to demand balance, regardless of all human desire, they would understand that they cannot waste that which the Sacred Fire provides without experiencing difficulty and distress. People are in conditions of discord and limitation because they have produced conditions of discord and limitation in the past. But once you enter into the Knowledge of the Sacred

Fire of this Beloved 'I AM' Presence, then your Law of Forgiveness acts, as you use the Violet Consuming Flame to consume the cause that has produced your present limitations or problems.

And in the Great Mercy of the Love that has provided that Violet Consuming Flame abides the Power by which you may go forward; and cleansing your world of that which is of human shadows, you may become the Sun of the Sacred Fire whose Violet Flame's Forgiving Love not only sets you Free, but wherever you abide, It will set all Life Free also. And It gives all Life a new chance to turn back to the Divine Way of Life, and once again live as the Mighty 'I AM' Presence and the Ascended Host originally designed.

The Original Way of Life was Purity and Balance. And those who will love the Sacred Fire enough to draw Its Momentum in and around themselves will return to the Divine Way to live Life, and what you call supernatural powers will begin to act through that Sacred Fire. Instead of being supernatural, They are the Natural Activities and the Natural Power of the Sacred Fire. You had Their use centuries gone. Mankind has used these Powers in every Golden Age; and since you are entering into that which is the Permanent Golden Age to the Earth, then you must again come into the use of these Powers of the Sacred Fire by which all manifestation is controlled harmoniously.

So Blessed Ones, if distress seems great in your beings or worlds, take time, if only for one whole minute, to send your love back to your Mighty 'I AM' Presence; and demand with every fiber of your being everything in your being and world become the Sacred Fire of the Flaming Christ, the Mighty 'I AM' Presence, They are one, or any Ascended Master, into the conditions about you; until those conditions yield to you the Perfection and the Harmony that sustains the Divine Plan's Fulfilment.

### **LESSON 3: SECTIONS OF THE ASHRAM**

In the early days of the present cycle of hierarchical effort (between 1925 and 1936), the ray at work upon humanity was the first ray. The activity of this ray culminated in the declaration of war by Great Britain in 1939, when the destructive force of that ray—misapplied and misdirected— led Germany to invade Poland. In 1932, the influence of the second ray began to assert itself and will continue to do so until 1945 when the seventh ray will swing slowly into activity. You will then have three rays producing simultaneous effects upon mankind:

1. The first Ray of Will or Power, expending its force.
2. The second Ray of Love-wisdom, reaching its meridian and holding the centre of the stage until 1957.

3. The seventh Ray of Ceremonial Order, coming into activity in combination with the other two—the will-to-love and the will-to-order—producing beauty out of the present chaos.

The Disciples, therefore, of the Master El Morya, of the Master Koot Hoomi and of the Master Rakoczy are reaching out towards a period of the intense activity. The destiny of the world lies in the hands of Their three Groups of initiated Disciples; with Them, the accepted Disciples of the three Groups are asked to cooperate and this offers opportunity to many everywhere. As they seek to vision the Plan, to cooperate with the three Masters and Their initiate Groups, their opportunity will emerge. This triangle of energy is held responsible by the great Leaders in Shamballa for the regularizing of world affairs. More than this it is not necessary for humanity to know.

*Discipleship in the New Age, Vol. I, pg. 730*

As you realize, the new Ashram of Synthesis carries the responsibility not only of incarnating (so to speak) as a conscious Soul within the body of humanity, but of building the new forms of the new civilization which can and will adequately house that incarnate Soul and provide for its continuing growth and development. The Ashramic Group life is constituted (if you will please excuse my terminology here) of three major “sections” insofar as its focus of attention is concerned.

These major sections which are determined by the three major Ashrams which have come together to create the new synthesis are:

- That section which deals with Divine Purpose, Divine Power, Divine Will, and which is reflected outwardly, works out within the body of humanity as Government; works out within the Group life as cooperative leadership—as each individual within the Group follows his own overshadowing Spiritual Soul guidance, which is his governing agent, so to speak. The head center then of the Group life is the Ashram.
- The second section of the Ashramic Group life is that of the consciousness aspect, the Soul life of the Group dealing primarily with the growth and development of the incarnate consciousness (incarnate on Ashramic levels within the causal sheath; incarnate below these levels within the threefold instrument). This section of the Ashram is reflected outwardly within the body of humanity primarily in the field of education; within the Group life, in the same field (that of teaching) as well as any other activity which deals specifically with the Soul life. I am placing in this section (and deliberately so because this is the New Age into which we have entered), healing; all of the cultural activities of humanity; and in part the field of science, particularly in research.

- The third section of the Ashram is that of intelligent activity—the form building section of the Ashram which has to do with the building specifically of the new forms of the new civilization. This works out in the outer life and affairs of the Group, and within the body of humanity in the field of business.

We have here three major sections of the Ashramic Group life insofar as that is concerned, of the Hierarchy. We see these three major sections out-pictured within the world of affairs today in this civilization, which is rapidly moving out of incarnation. The first major change to be made in the economic structure of humanity has to do with the relationship of these three sections which are a reflection, truly, of the Trinity itself: Spirit, matter and consciousness.

It is extremely important that you grasp this concept. The first major change in the new civilization must be made in the economy of the world itself. That change must be in the relationship of these three sections (or fields, or departments of human living) to one another. And that change is very simple, as follows:

- The purpose of business is to substantiate, subsidize the growth and development of human consciousness—to build those forms which carry the light, the love and the power of the Soul into outer expression. This is the purpose of business, any business. all business. This is its only purpose.
- For education to become a business or to enter into business – this is wrong relationship. Business is the intelligent activity which will build the forms of the incarnation necessary to the growth and development of the consciousness aspect itself. Finance, then, intelligent substance, is the substantiating, or subsidizing aspect or activity. This section then must support or subsidize the education of the human consciousness; the healing activity, which in this New Age, has to do with the healing of consciousness; all of the cultural interests and activities of humanity which relates specifically with the growth and development of the human consciousness, etc.
- The purpose of government is to coordinate these two other sections—that which deals with and is under the large heading of education (or rather the growth and development of the human consciousness); and the intelligent activity which supports, substantiates, subsidizes that growth and development. The government then must work through the concept and activity of cooperative leadership to coordinate the activities of the other two sections.

Thus, we begin to bring about within the world of affairs that right relationship between Spirit, matter and consciousness, which will not only heal the economic ills of humanity as a total, but which will generate a creative economy capable of transmuting the material values into spiritual values.

*Headquarter Series, 13 October 1961*

An Ashram is a Group of Souls who function consciously with a member of the Hierarchy as Disciples in the working out of the Divine Plan—not only for humanity, but for the One Life in which we all live, move and have our being.

Consider this for a few moments. An Ashram is largely functioning at a frequency level much higher than that of the three planes of human endeavor. It functions in ... the Buddhic sphere, i.e., on Soul levels, in ways which, at this particular time, I shall not endeavor to clarify. Such an Ashram has usually three (sometimes more) centers or focal points within the three worlds of human endeavor, which are the outlets into the body of humanity for the creative expression of the Ashram and the Master involved with and within that Ashram. These focal points are constituted of Disciples whose overshadowing Spiritual Souls are already functioning within the particular Ashram involved, and who, at that point in time and evolution, are karmically related (whether through choice or past association) with the working out of the Divine Plan for humanity as it has been brought into focus by the Ashram within the life and affairs of humanity. Such Disciples then have responded to the note being sounded by the Ashram; they have glimpsed (some more, some less) the Plan as it has been brought into focus by the Ashram; they have been inspired by the vision of a service which the Ashram is privileged to embody; and they have, in consciousness, brought their three-fold instruments into an alignment with all this to which they have responded.

*Headquarter Series, 11 March 1962*

Master Djwhal Khul: “My purpose in coming to you at this time is not only to focus your attention upon that principle, concept and energy for which I am responsible—that of Divine Love-Wisdom—but to clarify somewhat if I may, certain points regarding it which your work with the energy of Synthesis may tend to overlook.”

As you realize, the initial inflow or entry into this planetary life and affairs of that energy which can be defined as Synthesis (in that it reaches us from the Avatar of Synthesis, He Who has embodied, in relationship to our solar system, the principle and energy of Synthesis) is a synthesis primarily of first, second and seventh Ray energy. You realize of course, that any true synthesis is a synthesis of all of the seven Rays or seven Expressions of the One Life within which you live, move and have your being. But this synthesis of the many into the one has to be achieved through a synthesizing energy. The Avatar of Synthesis is One Who has embodied within Himself the perfect expression, in a perfect synthesis, of first, second, and seventh Ray in its relationship to our solar system, and specifically at this time, to this

planetary life and affairs. That synthesis in no way detracts from the special, the very special, characteristic and quality of any one of those three major Rays. A synthesis is achieved when two or more parts so perfectly complement one another that they merge into a total—a total that gives to each of its parts something which it did not previously have. Grasp this thought, this idea, and your understanding of the concept and the actuality (which includes, remember, the application of synthesis) will expand greatly. In the merging of the perfect complementing of one, two, and seven into a totality, none of the special characteristics and qualities of these three expressions of Divinity are lost or detracted from. They are enhanced by the fact of the merge, the perfect movement of these three into a one; and each then has been added to so that it is more than it ever was by itself. Its characteristics and qualities are lifted to the highest potential possible; and then, in addition, something new, a new dynamic which works for the total good of the total life as it is included within the Cosmos.

**The only subtraction, if I may call it that, from any part that goes into the making of a true synthesis, would be that of separation.**

The expression, of all of those characteristics and qualities which went into the synthesis, is beneficent or beneficial to every tiny life, every great life, within the whole of the Cosmic Life. In this synthesis, the quality as never before is that of Divine Love-Wisdom. This is the quality which underlies and moves through, within, interpenetrates, the expression of synthesis in an area of activity. Bring into your instrumentality the energy of Synthesis and express it, and that which is its true quality will show forth as the perfect expression of Divine Love-Wisdom. This will be the color, so to speak—it will color the skin, it will color the eyes, it will color the many lights of the body. It will color the tonal quality. It will color the movement, all expression—it will be the quality, the QUALITY, of every expression, which is one of synthesis. And it will qualify the action of the will. It will qualify the intelligent activity aspect. It will qualify the strength. It will qualify the actions. It will permeate everything so that it becomes one of the first recognizable characteristics of the energy of Synthesis. Try then to achieve this quality. Let it have a part in the choosing of your thoughts. Let it have a part in the choosing (you will note this term please) of your feelings, responses and reactions. Let this quality have a choice or a part in the choosing of your words and your deeds. Become the vehicle of that qualifying essence which is the binding force which holds together the many lives, great and small, of the One About Whom Naught May Be Said.

One other point that I would direct your attention to which may help with an understanding of this concept—and help you with your alignment (with its quality of synthesis), help you in becoming a vehicle for it. This quality has not one special or particular color. It is the essence of every color, and thus it is all-pervading.

#### **LESSON 4: DISCIPLES ON THE THREAD; APPLICATION OF SYNTHESIS**

The synthesis of first, second and seventh Ray energies brings the planet and humanity a new energy, a new force and a new substance with which to shape and mold a new civilization. The Synthesis reaches us from the Avatar of Synthesis, Who, acting, under the direction of a greater Cosmic Life, synthesizes the energies into a lower correspondence of a Cosmic energy as yet, of too high and subtle a frequency for us to reach.

The Avatar releases the new Synthesis to the Planetary Logos and The Christ, Who, in turn release it to the new Ashram of Synthesis via its focal point, the Masters El Morya, Rakoczy, and Djwhal Khul. These three use several methods of release for the distribution of the energy to humanity and through humanity into the devic lives of the planet. Among these methods is that with which we are here concerned; it is released to seven Disciples on the thread, each functioning as a Soul in the Ashram and each serving in incarnation as Disciples in a particular department of human living. The seven Disciples, each in his (or her) own field, continue the distribution of the Synthesis energy via a threefold method.

1. Through a creative service activity which gives body and form to the incoming energy. We are referring here to creativity such as in the fields of art, literature, music, medicine, psychology, etc.
2. Via Groups of Disciples working with them both esoterically and exoterically in all fields of human endeavor for human betterment.
3. Via special meditation effort carried out both individually and in company with co-workers, which directs the energy along those paths of manifestation indicated by the Divine Plan for humanity.

The many Disciples who are attracted into a relationship with one or another of the seven Disciples on the thread form seven major Groups which continue the distribution process via:

- Their chosen service activities;
- An application of the Synthesis energy into their daily lives and affairs;
- And via a radiation of it through that network which is humanity.

Let me indicate here—both to the seven Disciples themselves (one with whom you of the immediate Group are acquainted and related) and to the Disciples working with them—certain factors of invocative importance:

- “The Power of the Disciple of Synthesis is the Power of Divine Purpose synthesized with human need.”

- “The quality, and therefore, the radiating, conditioning and relating energy of the Disciple of Synthesis is the quality of the Love of the One Life synthesized with human misery.” “The service capacity of the Disciple of Synthesis lies along the line of his ability to organize that within the framework and upon the ground of that which is false and unreal.”
- “Ever will he be faced and work with the pairs of opposites as paradox so that paradox will appear to be the law and rule of his life. Yet out of paradox will the new good come forth.”

Each and every Disciple working within the field of humanity (from a focus as Soul within the new Ashram of Synthesis) has before him or her the seemingly difficult task of understanding the energy which is now his or her prime concern. What is Synthesis? What are its characteristics and its effects in manifestation? How may one appropriate and rightly use it in service to the Divine Plan for Humanity? What are its dangers? And how may one protect oneself, one's Group and humanity from those dangers?
